Education

Rajiv Gandhi Proudyogiki Vishwavidyalaya
Bachelor of Technology in Computer Science and Engineering

June 2019 – August 2023
Bhopal, Madhya Pradesh

Work Experience

WTM IT Limited – Software Developer | July 2023 – Present

Indore, Madhya Pradesh

Developed scalable Laravel applications using clean architecture and SOLID principles. Integrated third-party APIs like Fast2SMS and Razorpay for messaging and payments. Collaborated with front-end teams to deliver features and enhance UI/UX. Implemented CI/CD pipelines using GitHub Actions for automated deployments. Utilized AWS services such as EC2, S3, and IAM for secure hosting and storage. Optimized SQL queries and application logic for improved performance, and maintained code quality through regular reviews and standard enforcement.

Projects

Tolxa – Vacation Rental Platform | August 2024 – Present

https://tolxa.con ⬈

Technologies: Laravel, MySQL, Bootstrap 5, JavaScript, Razorpay

- Developed a scalable vacation rental web platform enabling users to explore, book, and manage property stays.
- Built a feature-rich admin panel for managing users, bookings, properties, and notifications.
- Integrated Twilio for OTP-based mobile authentication and booking confirmations.
- Implemented Razorpay payment gateway for secure, real-time transactions.
- Enhanced booking flow with AJAX-based UI updates and dynamic property filters using JavaScript.
- Ensured full mobile responsiveness and cross-browser compatibility using Bootstrap 5.

Veloxinfra – Real Estate Listing Platform | March 2024 – Present

https://veloxinfra.com ⬈

Technologies: Laravel, MySQL, Bootstrap 5, JavaScript, Razorpay

- Developed a dynamic real estate listing website for property showcasing and lead generation.
- Designed and implemented an intuitive admin panel to manage agents, listings, inquiries, and SEO metadata.
- Built dynamic filtering, pagination, and search features for easy property navigation.
- Focused on clean UI/UX using Bootstrap 5 and improved frontend interactivity with JavaScript.
- Optimized backend queries and models for efficient property listing retrieval and performance.

Technical Skills

- **Frontend**: JavaScript (ES6), jQuery, Bootstrap 5, HTML5, CSS3
- **Backend**: PHP, Laravel (Artisan Commands, Task Scheduling, API Development), RESTful APIs
- **Database**: MySQL, SQLite (Schema Design, Query Optimization)
- **Cloud & DevOps**: GitHub Actions (CI/CD), AWS (EC2, S3, IAM, RDS), Docker
- **Tools & Version Control**: Git, GitHub, Postman, VS Code, Chrome DevTools
- **Design Patterns**: MVC, Repository Pattern, Dependency Injection, SOLID Principles, Service Layer

Courses & Certifications

- **AWS Cloud Practitioner Essentials**
  AWS Skill Builder – Completed in July 2025
- **AWS for Beginners**
  Great Learning Academy – Completed in July 2025
